Attachment(s)			
1) Notice of References Cited (PTO-892)	4) 🔲 Interview	Summary (PTO-413)	
2) Notice of Draftsperson's Patent Drawing Review (PTO-948		(s)/Mail Date Informal Patent Application (PTO-152)	
 Information Disclosure Statement(s) (PTO-1449 or PTO/St Paper No(s)/Mail Date <u>2 and 4</u>. 	6) Other:		

Application/Control Number: 10/023,686

Art Unit: 2124

1. The disclosure is objected to because of the following informalities:

Page 10, line 16, "Figs. 9 and 11" should be -Figs. 9 to 11--.

Appropriate correction is required.

2. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As per claim 1, the "input data" for "selecting either the NAND operation result or the NOR operation result" (line 7) should be positively recited. See detail of claim 2.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-6 and 15-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goto (applicant's admission Prior Art, Reference AM) in view of Miyamoto and Bui.

As per **independent** claim 1, Goto discloses, e.g., see Figs.16-18, the invention substantially as claimed, including: **first** – **fourth logic circuits** <u>except</u> the detail "first logic circuit for performing a <u>NAND operation</u> and a <u>NOR operation</u>..., for <u>generating an XOR/XNOR operation result</u> ... using the NAND and NOR operation results ..." (lines 3-7). However, these features are old and well known in the art. For example, **(1) Miyamoto** discloses (e.g., see Figs. 11A & 11C) logic circuits using NAND &

Application/Control Number: 10/023,686

Art Unit: 2124

Page 3

NAND/AND or NOR & NOR/OR for generating XOR/XNOR and (2) Bui discloses (e.g., see Fig. 3) a logic circuit having a "third data" Carry-in for selecting either NAND operation result or NOR operation result. Therefore, it would have been obvious to a person having ordinary skill in the art at the time the invention was made to combine Miyamoto and Bui in Goto, thereby making the claimed invention, because the proposed device is a 4-2 compressor having the detail XOR/XNOR as claimed.

As per dependent claim 2, Bui shows the claimed features.

As per dependent claims 3-5, Goto shows the claimed features.

As per dependent claims 6 & 15, the combine of Miyamoto and Bui shows the claimed features.

As per **independent** claim 16, due to the similarity of independent claim 16 to the combination of claims 1-5, it is rejected under a similar rationale.

- 4. Claims 7-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cited references are art of interest.

Application/Control Number: 10/023,686

Art Unit: 2124

The following is an examiner's statement of reasons for allowance: the recorded 6. references do NOT teach or suggest: (1) the 4-2 compressor having the detail of XNOR means as recited in dependent claim 7 and (2) the 4-2 compressor having the detail of XOR means as recited in dependent claim 8.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan V. Mai whose telephone number is (703) 305-9761. The examiner can normally be reached on Tue-Fri from 6:30am to 5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kakali Chaki, can be reached on (703) 305-9662. The fax phone numbers for the organization where this application or proceeding is assigned are:
